

Rapid Green Line Traffic Calming Studies

Background

The City of San Antonio Transportation Department is conducting traffic calming studies in response to resident concerns about cut-through traffic and speeding near the VIA Rapid Green Line project. Traffic calming means improving the street design to reduce speeding and cut-through traffic, making streets safer for people walking and biking.

The project started with listening sessions in the Alta Vista and Monte Vista neighborhoods, followed by field visits. Based on what was learned, the study area (Figure 1), was expanded to include a broader area bounded by Blanco, Basse, McCullough, and Ashby, with the addition of Mulberry and Summit.

Project Status

The preliminary alternatives analysis is underway to identify the top 20 priority locations for potential improvements. Each priority location will be assessed to see which designs are feasible. These ideas will be shared at the first public meeting, where the community can provide feedback. (Figure 2)

Next Steps

The project will continue with more public meetings, data collection, and design work. Final plans are expected by January 2026, followed by construction.

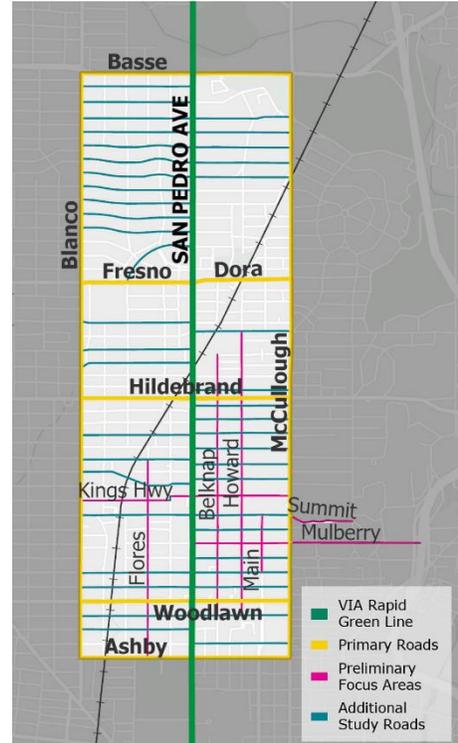

Figure 1: Traffic Calming Study Area

Rapid Green Line Traffic Calming Studies

Table 1: Proposed Project Schedule

| Project Activity | Timeline |
|--------------------------------------|-------------------------------|
| Listening sessions | February – March 2025 |
| Field visit | March – April 2025 |
| Preliminary alternative analysis | July – August 2025 |
| Top 20 priority locations | August 2025 |
| Traffic calming assessment | September – October 2025 |
| Public meeting #1 | October 2025 |
| Block walking & surveys | October – November 2025 |
| Public meeting #2 (if needed) | November 2025 |
| Final traffic calming recommendation | October – December 2025 |
| Public meeting #3 | December 2025 |
| 90% design plans | December 2025 – February 2026 |
| Public meeting #4 | February 2026 |
| 100% design plans | February – March 2026 |
| Pre-construction public meeting | March 2026 |
| Construction start | April 2026 |

Please note: This schedule is for planning purposes only. All dates are subject to change based on project needs, stakeholder input, and unforeseen circumstances.
